A. General Description

IG610 is a brand new general purpose handheld area imager bar code scanner which is designed especially for retail, logistic and health care management market. We include friendly functions with replaceable multiple interface cable options that makes it more easily to be operated by customers to accommodate it to user environments.

IG610 supports with up to 500mm reading depth of 1D and 2D barcode, its scan rate is up to 120 scans per second in linear emulation and 60 images per second in 2D area mode. Based on CMOS technology for optimal image sensitivity and dynamic range, the IG600 features scanning speeds two times faster than traditional 2D imagers.

In short, IG610 is a high performance handheld area imager scanner provides customers with the most cost-effective solution in the market and perfectly suitable and definitely the best choice for any retail and logistic environment.
